# JUNIOR QUIZBOWL

## Animal Welfare & Handling

1. If the withdrawal period for an antibiotic is two weeks, how long must you wait before marketing a pig that has been treated (according to the label) with an antibiotic?

- A. 0 days
- C. 14 days**
- B. 7 days
- D. 21 days

2. True or **False**. If properly processed and stored, fresh boar semen remains viable for periods as long as two months.

3. True or **False**. The duration of estrus (heat) in gilts is usually longer than that of sows.

4. Why is it advantageous for sows to farrow in farrowing crates rather than in open pens?

- A. Reduced piglet survivability
- B. Sow not as likely to kill piglets
- C. Better control of climate
- D. B and C**

5. Approximately how old are boars when they are castrated on commercial swine farms?

- A. 3-10 days**
- B. 10-20 days
- C. 20-30 days
- D. 2 months

6. True or **False**. Loading chutes should have slotted sides to provide fresh air.

7. Where on a pig's body should an intramuscular injection be given?

- A. In the ham
- B. In the back/loin
- C. In the abdomen
- D. Behind the ear/in the neck muscle**

8. **True** or False Tail docking in piglets increases animal welfare by reducing tail biting.

9. True or **False**. If a pig refuses to move, it should be pulled by the ears to where it is supposed to go.

10. When reading ear notches on pigs, which ear represents the litter number?

- A. Left
- B. Right**

11. When reading ear notches on pigs, which ear represents the individual number?

- A. Left**
- B. Right

12. A neighbor weaned a sow. It's now 18 days later, and she still hasn't come back into heat. Even if you never saw her, what would you expect her body condition to be?

- A. Thin**
- B. Fat

13. Why should bedding be used in the pens of pigs kept in unheated facilities

- A. To keep them cool
- B. To soak up manure so that pens don't have to be cleaned
- C. To keep pigs warm in cold weather**
- D. For biosecurity reasons
